GENERAL INFORMATION SECTION

1. General information about the Czech Republic

A. Demographic, Economic, Social and Cultural characteristics of the Czech Republic

1. The area of the Czech Republic is 78,866 km and as of 31st December 2007 the number of inhabitants was 10,323.000 people.¹ The population density was calculated 130 inhabitants per square kilometer.²

2. The increase in the number of children born alive recorded since 2002 has slightly slowed down and in 2008 the number of children born alive was 91,300. The index for the total fertility sum (defined as children born alive per woman which is within the reproduction age) in 2007 increased up to 1.49 (1.33 in 2006). The total number of inhabitants in the Czech Republic has been continuously increasing in the past four years although up until the year 2005 it was solely due to foreign immigration into the Czech Republic.³ The population growth in 2006 with 36,100 people was the highest since the formation of the autonomous Czech Republic in 1993.

3. The growth of the birth rate in the Czech Republic since 2002 was preceded by its dramatic decrease compared to the previous period when even the gradual decrease in number of death rates still indicated the population decrease. This situation was not compensated even by the positive balance of migration and therefore since 1994 the population in the Czech Republic was decreasing. This trend of the total population balance has been reversed in 2003 since when the population has been on the increase but solely due to the majority of immigrants from abroad.³

² <http://www.czso.cz/csu/2006edicniplan.nsf/p/4032-06>

³ Since 2001 (according to the Census, Houses and Flats in 2001), the figures include also foreigners with a visa for more than 90 days (in accordance with Act No. 326/1999 Coll., On Residence of Aliens) and foreigners with granted asylum (in accordance with Act No. 325/1999 Coll., On Asylum). From 1.5. 2004, in connection with the 'Euronovela' Act No. 326/1999 Coll., On Residence of Aliens, data is concerned with EU citizens with temporary residency in the Czech Republic and the citizens of the third countries with long-term residency in the Czech Republic.

4. During the year 2006 there were 105,800 children born alive in the Czech Republic which makes 3,600 more than in the previous year and at the same time it is the most since the year 1995 when the number of children born alive decreased below a hundred thousand for the first time. The five year period between 2001-2005, within the context of evaluation of the long term development of the birth rate, meant a change of this trend and radical decrease was replaced by the increase. The year 2005 was after 10 years again the year when the number of births surpassed the limit of 100,000.

5. Fertility is still low and does not secure simple reproduction of the population in a long term outlook. The continuation of postponing the maternity until an older age is illustrated by the fact that the average age of a mother continues to rise, in 2007 to 29.1 years, in 2008 to 29.3 years.

6. The number of concluded marriages from January to September 2008 was 4,000 lower than in the same period the year before.⁴ There were 44,700 marriages concluded in total. At the same time there were 23,400 divorces during the first three quarters of 2008, this situation can be compared to the same period of the year 2007, when there were 23,200 registered divorces. The intensity of divorcing has now for several years been stabilised at the level of around 50.0%.

7. In the year 2007 life expectancy at birth increased to 73.7 years for men and 79.9 years for women, compared to the previous period.

8. The composition of the population in terms of the general representation of men and women is stable: women have a slightly higher population representation. On 31st December 2005, out of a total population of 10,251.079, women were represented by 51.2%. Between 2000-2004, it was always 51.3%. The representation of women and men within the age categories varies. The population of men is slightly more prevalent until the age of 30. The proportion between men and women is relatively equal between the age of 30 and 49. The population prevalence of women starts from the age of 50 and increases with age. In the age group 70-79 years the proportion of women to men is 60.4% to 39.6% and in older age groups it is 69.6% to 30.4%.

⁴ The interest in the marriage increased in year 2007 due to the attractive date 7.7.2007, when 4,400 marriages were contracted within one day.

9. The presented data are summarised in the following table:

Index	Measuring unit	2002	2003	2004	2005	2006	2007
<i>Population</i>							
Population (middle class)	Thousand People	10, 200.774	10, 201.651	10, 206.923	10, 234.092	10, 266.646	10, 323.000

⁶ PPS (Purchasing Power Standard) - Standard of Purchasing Power; average purchasing power 1 PPS is equal to the average purchasing power of 1EUR in countries of EU25.

⁷ Growth of Gross Fixed Capital to GDP.

⁸ From Data on the number of vacancies converted to full-time work hours according to the method ESA 95, it means including people who work full-time and part-time, foreign workers (employees and self-employed) and an estimation of workers from the statistically not recorded economy.

10. The Czech Republic is still a very homogeneous nation within the framework of EU. The largest ethnic group in the Czech Republic after the Czech and Moravian is the Slovakian with only 1.9% inhabitants in the country in 2001. Although the Roma people in the Czech Republic are the most diverse from the majority of the Czech population on social and demographic level, there is not enough statistic data on the Roma people. The reason is that the Roma people are not systematically monitored. Only a part of the total number was registered which comprised the Roma inhabitants who registered themselves (less than 12, 000) in 2001 Census, Houses and Flats. The growing problem of social exclusion was highlighted by the research of the GAC agency in September 2006. According to the GAC research, in 300 areas in the Czech Republic 60,000-80,000 predominantly Roma inhabitants are suffering from the social exclusion.

11. The following table contains population data according to the nationality and ethnicity, mother tongue, religious belief and sex¹⁰

12. In 2005 there were more than 4,000.000 households (4,189.700 households in total) in the Czech Republic. Most of the households (62.5%) consisted of complete families, one quarter (25.1%) consisted of single person households, 11.3% represented incomplete families and the rest (1.1%) were non-family households. There are 473,100 incomplete families in the Czech Republic in total and more than 1,000.000 (1,049.100) of single person households.

13. The head of the household in both types of the above mentioned households is a woman rather than a man: a woman is dominant in 77.3% of incomplete families and 62.6% of single person households.

14. The prevalence of women dominating the household over men is also apparent in the complete family households (71.4% to 28.6%) in the age 15-24. The older age groups show more similar numbers in both sexes in terms of the household domination and in the age over 50 years and more is the household domination represented by men (53.6% to 46.4%).

15. The incomplete families are largely dominated by women regardless of age. Women form three quarters or more within each age group which is between 74.8% in the age group of 50 years old and older and up to 79.8% in the age group of 25-34 years old.

16. Single person households are dominated by men in all the age groups except the oldest age group over 50 years old which are dominated by women in 72.8% of cases. The highest number of men (74.2%) in single person households is within the age group of 35-44 years old.

17. The following table shows a summary of data on the average size of a household and the sharing of households with one parent:

Type of Household	2002	2003	2004	2005	2006
Thousand					
Total	4, 052.6	4, 102.5	4, 150.5	4, 186.7	4, 217.3
Complete Family	2, 620	2, 605.3	2, 605.7	2, 617	2, 646.2
Incomplete Family (household with one parent)	447,5	457	471.7	473.1	476.4
Single person household	927.8	981.1	1, 018	1, 049.1	1, 054.4

Non-Family household with several members	57.4	59.1	55.1	47.4	40.3
%					
Total	100	100	100	100	100
Complete Family	64.6	63.5	62.8	62.5	62.7
Incomplete Family (households with one parent)	11	11.1	11.4	11.3	11.3
Single person household	22.9	23.9	24.5	25.1	25
Non-Family household with several members	1.4	1.4	1.3	1.1	1

18. The long-term trend of population moving into the cities in many European countries has also been apparent in the Czech Republic. This fact is shown by data from the Census in 2001. In relation to the size of town groups the average population growth in the Czech Republic which is 35.2%, was surpassed in the groups of towns with more than 5000 inhabitants. In 2001 63% of the population of the Czech Republic lived in the cities.

Living standard

19. The average annual household consumption of a household member was CZK 120,208 in the year 2007, while the Net annual income was CZK 125,817. The share of food costs has been decreasing within the last years and in 2006 and also in 2007 it was 1/5 of the total household outgoings. The education costs have also slightly decreased. In 2003 the education costs represented 0.6% of all household outgoings, in 2006 only 0.5%, then in 2007 they again slightly increased to 0.6%. In contrast the accommodation and health costs increased. Accommodation costs including energy and water increased one percent since the year 2003 up to the total of 20.7% in 2006, in 2007 slightly decreased to 19.9%. Health costs increased one tenth of a percent to 2% of the total household costs in the year 2006. In 2007 the health costs increased to 2.3%.

The Population ratio below the national limit of poverty

20. The Czech Republic has set the limit of poverty as a subsistence minimum. The subsistence minimum is the level of household income which secures the basic living needs to its members. Below this level the state of material poverty begins. The subsistence level income is used as a criteria for making decisions regarding the social security benefits of the citizen or the household. If the income of a citizen does not reach the level of subsistence and he or she cannot increase it due to the serious circumstances, the citizen may be able to receive benefits of Assistance in material needs. The subsistence minimum was established in the Czech Republic in 1991 and its level is adjusted on the first date of each year according to the growth of consumer prices. In the event that the consumer prices growth reaches over 2%, review of the subsistence minimum may

happen at any time of the year. In the year 2005, the subsistence level income has been set to CZK 85,714 per year. In the same year 995,565 inhabitants lived below this level which is 9.8% of the whole of the population in the Czech Republic. In 2007 the subsistence level income was set to CZK 93,560 per year and 995,347 inhabitants lived below this level within the same year.

21. Coefficient Gini, which describes the distribution of the household income, reached the value of 0.253 in 2005 which means that the Czech Republic belongs to the nations with very little income disparity.

The Percentage of infant and mother mortality

22. The Czech Republic belongs to the nations with the lowest infant mortality. Most of the changes in the intensity of infant mortality happened up to the year 2000, after which only very minor changes occurred. The coefficient of early newborn mortality (mortality in 7 days to 1000 of newborn) decreased 50% from 3.2‰ to 1.6‰ between the years 1995-2000. The total infant mortality (to one year) was 3.1‰ in 2007 and in 2000 it was 4.1‰. The development of the infant mortality level in the past years exhausted the possibility of its further dramatic decrease. Mother mortality is defined as the number of women dying in pregnancy, during the labour and until 42 days of six weeks to 100,000 newborn babies. The number of women who die in this way is below 10 cases of mortality per year since 1994. The mother mortality rate fluctuates between 2-7 mortality cases to 100,000 children born alive.

The medical termination of pregnancy in relation to live births and the use of contraceptives by women within fertile age range

23. In 2007 153,500 pregnancies were registered. Medical experts administered 40,917 abortions in total in the same year of which 25,414 were induced abortions. The number of induced abortions for medical reasons was 4,789. From the total number of induced abortions 19,201 were mini abortions. Since the year 2000 the number of induced abortions lowered to more than 7% - 34,627 abortions were administered from the registered 137,124 pregnancies. The decrease in the number of induced abortions is put down to the wide availability of modern contraceptives. According to the Institute of Medical Information and Statistics, in 2005 contraceptives prescribed by a doctor were used by 51% of women in fertile age, 45% of women used hormonal contraceptives and the rest of the used contraceptives were intrauterine. In 1975 only 16% of

women used contraceptives which were mostly intrauterine (9%) and 20 years later the number increased up to 27% of women.

24. The radical decrease of induced abortion intensity was recorded across the age structure and mostly in the 20 and 30 year old age groups. On the other hand the number of spontaneous abortions has grown within the last five years which is probably due to higher risk pregnancies becoming more common as more pregnancies have been recorded in the older age groups.

The percentage of HIV/AIDS and the main infectious and non-infectious diseases

25. The Czech Republic belongs to the nations with the lowest number of HIV/AIDS cases. During the period of monitoring the number of new cases the figures showed around 0.5 cases to 100,000 persons. Approximately 1 in 5 of the infected cases out of the total number of infected cases were women and approximately 6% of the infected cases were pregnant women.

26. In 2005 there were 144,146 infection cases recorded in the Czech Republic. The regular vaccination in the Czech Republic continued, namely against polio, diphtheria, tetanus, whooping cough, rubella, measles, mumps, and Hepatitis virus B. The result showed no more infections with polio, diphtheria, tetanus, measles and congenital rubella. There were 412 recorded cases of the whooping cough (A 37.0) and 1,803 cases of mumps (parotid gland). Parotid gland infection affected predominantly young men between 15-19 years. There were also reported 8 cases of rubella. The decrease of illness is a result of the effective vaccination.

27. The infection from Hepatitis B (B16) has decreased as a result of the vaccination of 12 years old children since 2001. VHB has been practically eliminated in the age group up to 16 years old. The 117 infected were syringe drug users. Hepatitis virus A was recorded in 322 cases. The increase of the illness was caused by 8 epidemics during which 190 persons, predominantly of Roma origin were affected. The 44 cases were imported chiefly from Egypt, Brasil and the Ukraine. Amongst other types of Hepatitis (B17-B19) there were mostly cases of Hepatitis C (844) reported which is virtually the same amount as in the previous year. The 526 of the infected cases were syringe drug users. 37 cases Viral Hepatitis E infections were reported which is one more case than in the previous year from which 6 times the virus was imported from India. In 2004 there were 99 reports of meningitides infections which is practically the same as in the previous years.

Mortality and 10 major causes of death

28. The Gross level of mortality since the year 2000 is stagnating around the figure of 10.5%.

During 2007 104,600 persons died which makes it 3,500 less than in year 2005.

29. The level of mortality according to the number of deaths to the individual causes has not changed dramatically since the year 2000. The major mortality factor is shown in relation to the diseases of the circulatory system which forms 45% of mortality in men and 56% of mortality in women. The second largest cause of mortality is related to the formation of neoplasms which has increased in the structure of mortality during the present period, it forms approximately one quarter of all mortality causes.

30. Table: The standardised level of mortality of men in the selected causes of death to 100,000 men between 1995 - 2007.

Mortality causes	1995	2001	2002	2003	2004	2005	2006	2007
Neoplasms	345.1	317.5	323.3	321.1	315.2	296.8	286.8	277.5
Malignant neoplasm of lungs ¹¹	101.6	85.8	84.1	81	82.1	77.2	73.6	71
Diseases of circulatory system	708.1	567.6	560.6	568.5	530.9	508.1	477.8	453.7
Acute myocardial infarction	175.9	126	113.1	106.1	91.3	81.3	72	68.1
Vascular disease	176.3	148.6	144.7	148	127.2	123	113.4	91.6
Diseases of respiratory system	62.5	55.6	55.6	59.7	55.4	65.9	60.3	59.4
Diseases of digestive system	53.6	50.7	50.3	50.8	50.4	52.4	50.2	49.5
Injury and poisoning	106.2	90.4	91.4	96.3	89	82.8	77.6	78
Road traffic accidents	23.2	20.8	20.5	20.7	18.3	17.9	15.5	17.4
Suicides	25.8	24.9	23.3	26.2	24.3	23.8	21.1	20.8
Other	60	61.7	65.1	68.5	65.7	70.7	71.5	73.1
Total	1,335.6	1,143.6	1,146.3	1,164.9	1,106.6	1,076.7	1,024.1	991.2

¹¹ Malignant neoplasm of trachea, bronchi and lungs.

31. Between 1975- 2006 the level of intensity of mortality of women was on average at 60% of the mortality rate of men. During the whole period the most similar figures on the mortality causes were related to the brain vascular disease (only 20% difference). The difference between the intensity of mortality caused by acute myocardial infarction has also reduced. The most apparent differences in the level of mortality between men and women were in 2007 shown in cases of injuries and accidents, in particular in cases of suicide where the intensity of mortality of women was reduced to a fifth of male suicide mortality. This negative development of mortality in women was caused by neoplasms of the lungs and the decrease in the intensity of mortality by the same cause in men has reduced the differences between the sexes from more than 90% in the year 1975 to 73% in the year 2006. In case of other causes of mortality, high numbers of male mortality has not dramatically changed.

32. Table: Standardised level of mortality of women in the selected causes of death to 100,000 women between 1995-2006.

Mortality causes	1995	2001	2002	2003	2004	2005	2006	2007
Neoplasms	191.4	179.3	175.3	177.5	173	166.2	164.9	157
Malignant neoplasm of lungs	16.8	19.1	18.2	18.8	18.6	18.8	19.7	19.1

Other	46.8	44.9	45.1	48	46.7	50.3	48.5	50.6
Total	798.9	692.2	685.9	703.6	661.9	657.2	613.2	595.4

Education

33. School attendance in the Czech Republic is compulsory.¹² Compulsory school attendance applies to Czech citizens, citizens of other EU Member States and their family members, foreigners with permanent residency, long-term residency or visa for over 90 days in the Czech Republic and people that have been granted asylum or applying for asylum. Compulsory school attendance lasts 9 years. In 2006/2007 the attendance of Elementary school was 876,513 pupils in total and there were 62,658 teachers, (that is one teacher per 14 pupils). In June 2007 the number of pupils that completed school were 117,921.

34. The secondary school system was attended by 533,000 students in the same year. There are approximately 48,000 teachers operating in Secondary schools.

The economic situation in the Czech Republic

35. The Czech economy has been growing continuously since the beginning of 1999. Joining the EU shown positive effect in 2004 apparent in the fast turn-over growth in the foreign market due to a wider connection with the international exchange.

36. The Czech economy has kept its record speed of growth of the Gross Domestic Product also in 2007 when the economic development increased by 6.5%. The growth of the Gross Domestic Product was followed by employment growth (1.8%). The rate of inflation reached 2.8%. Nevertheless in the first quarter of 2008 the growth of the Gross Domestic Product decreased to 5.4%.

37. Harmonised index of consumer prices reached on average 2.1% per year. The consumer prices index have been growing continuously since the year 1993. The table below indicates the development of the index in terms of the prices in the year 2005:

	2002	2003	2004	2005	2006	2007	2008
Index of consumer prices - total 2005 = 100	95.4%	95.5%	98.1%	100.0%	102.5%	105.4%	112.1%

38. The level of unemployment has been continuously decreasing and on 31.12. 2007 reached 5.3% (in the second quarter of 2008 it decreased to 4.2%).

¹² Due to the fact that the school attendance is compulsory in the Czech Republic, the percentage of literacy or the number of completed attendances is not recorded.

39. According to the figures in the main employment the number of employees increased by 52,500 to 4,032.000 and the number of people working as self-employed increased by 16,000 to 779,200. Employment figures increased in the secondary sector (industry, building) by 48,900 to 1,929.400 and in the tertiary sector (services) increased by 23,400 to 2,716.000 people. The primery sector (agriculture, forestry, fish industry) which showed the decrease of employment since the 90s still shows a continuous decrease of employees by 7,700 to 181,700.

40. The total level of employment of the age group between 15-64 years has annually increased to 66.1%. Although the level of employment is reduced by the rapid growth of university students, the number of employed persons is considerably growing as a result of employment of the strong age groups which were born in the period between the 40s and the 50s and in the first half of the 70's.

41. The level of unemployment in the Czech Republic is more clearly demonstrated in the following table:

Age group	2002	2003	2004	2005	2006	2007
Population 15+	7.3	7.8	8.3	7.9	7.1	5.3
15-64 years	7.3	7.8	8.4	8	7.2	5.4
Men 15+	5.9	6.1	7	6.5	5.8	
15-64 years	5.9	6.1	7.1	6.5	5.9	
Women 15+	9	9.9	9.9	9.8	8.8	
15-64 years	9.1	9.9	10	9.9	8.9	

42. The table below contains data on employment in the major sectors of economic activity:

	Employment	2002	2003	2004	2005	2006	2007
Total		4,764.9	4,733.2	4,706.6	4,764	4,828.1	4,907.7
	Sectors

Gross Domestic Income

43. Gross National Income has been growing from 2000 to 2006 but in 2007 began to decrease. The speed of growth fluctuates between 2-3%. Development of Gross Domestic Income is shown in the following table:

		2001	2002	2003	2004	2005	2006	2007
Gross National Income	CZK (Billion)	2,273.2	2,352.1	2,466.1	2,661.3	2,846.4	3,042.0	3,340.0
(previous year = 100)	%	103.0	102.8	104.2	103.4	105.7	104.8	

The State social costs

44. The total sum of CZK 1,362 billion was designated for public costs in 2006 from which 9.7% has been allocated to education, 14.6% to health, 29.8% to social security and 6.5% has been allocated to housing.

The Domestic and foreign debt

45. The Central Government debt of the Czech Republic has been growing since 1995. The total Government debt was CZK 892.3 billion in 2007 from which the foreign debt formed CZK 123 billion and domestic debt formed CZK 769.3 billion (86.2%).

B. The constitutional, political and legal structure of the Czech Republic

46. The legislative power in the Czech Republic is held by Parliament. Parliament consists of two chambers: The Chamber of Deputies and the Senate. Every citizen of the Czech Republic who has reached the age of 18 has the right to elect members of the Chamber of Deputies and the Senate.

47. The Chamber of Deputies has 200 members elected for 4 years. The election into the Chamber of Deputies is conducted by a secret ballot on the basis of universal, equal and direct suffrage in accordance with the principles of proportional representation. Every citizen of the Czech Republic who has the right to vote and has not encountered any obstacle to the exercise of voting rights¹³ on the day of elections and reached the age of 21, with exception of restrictions on personal freedom stated by law in order to protect the health of people, may be elected to the Chamber of Deputies.¹⁴

48. The Senate has 81 members who are elected for a 6 year period. Every two years one third of the members of the Senate are elected. The election for the Senate is conducted by a secret ballot on the basis of universal, equal and direct suffrage in accordance with the principles of proportional representation. Every citizen of the Czech Republic who has the right to vote, reached the age of 40 and has not encountered any obstacle to the exercise of voting rights may be elected to the Senate .¹⁵

49. The head of the state is the President, who is elected by Parliament at a joint meeting of both Chambers.¹⁶ The term of presidential office lasts 5 years and no one can be elected for the post of the President more than twice in a row. Any citizen eligible for election to the Senate may be elected President. The President has the right to take part in meetings of both Chambers of Parliament and meetings of the Government. The chief legislative power belongs to the Government which consists of the Prime Minister, the Deputy Prime Minister, and Ministers. The Government is accountable to the Chamber of Deputies. The Prime Minister is appointed by

¹³ In accordance with Act No. 247/1995 Coll., On elections to Parliament of the Czech Republic and amending certain other laws, as amended by Act No. 212/1996 Coll.

¹⁴ Provision of the Paragraph 2, Act No. 247/1995 Coll. states: the obstacles to the exercise of voting rights are: a) the statutory restrictions of personal freedom in order to protect the health of people, b) deprivation of legal capacity.

¹⁵ In accordance with Act No. 1/1993 Coll., Constitution of the Czech Republic and Act No. 247/1995 Coll., On Elections into the Parliament of the Czech Republic, as amended.

¹⁶ In accordance with Constitutional Act No. 1/1993 Coll., Constitution of the Czech Republic and Act No. 90/1995 Coll., On the Rules of Procedure of the Chamber of Deputies.

the President and according to his proposal other members of Government are appointed. Member of the Government may not be engaged in activities contrary to the nature of the performance of his functions. The Government may ask the Chamber of Deputies for a vote of confidence. The Chamber of Deputies may express no confidence in the Government. The Prime Minister shall submit his resignation in the hands of the President whilst other members of the Government shall submit their resignation to the President through the Prime Minister. Resolution of the Government is to be approved by more than half of its members. The Government may issue decrees in order to implement a legal act within the limits of the law. The Ministry, other administration authorities¹⁷ and organs of Territorial administration may, on the basis and within the limits of the law, issue legal decrees if they have been appointed for it by law.

50. In accordance with the Constitution of the Czech Republic the control of the management of the state assets and the performance of the state budget is executed by an independent body – The Supreme Audit Office. The President and The Vice President of The Supreme Audit Office are appointed by the President of the Republic on the basis of the proposal of the Chamber of Deputies. The scope of power, legal position and organisation structure as well as other details regarding the Supreme Audit Office are given by law.¹⁸

51. The central bank of the state is the Czech National Bank. The chief objective of the Czech National Bank is to ensure price stability. The activity of the Czech National Bank may not be interfered with except for the legal cause. The scope of power, legal position and other details are given by law.¹⁹ The bank headquarters consist of a Committee with seven members. The members are appointed and dismissed by the President of the Czech Republic. The membership in the bank Committee is not to be combined with the membership in the Chamber of Deputies, Government position or high position in other banks and business organisations.

The political system and elections

52. According to the Constitution the political system is based on free and voluntary development and open competition of the political parties and movements with respect to the basic democratic

¹⁷ Power and area of legal activity of the highest state administration is designated by the Czech National Council, Act No. 2/1969 Coll., On the establishment of Ministries and other central organs of the State Administration of the Czech Republic, as amended.

¹⁸ Act No. 166/1993 Coll., On the Supreme Audit Office, as amended.

¹⁹ Act No. 6/1993 Coll., On the Czech National Bank, as amended.

principles and rejection of violence as a means to promote individual interests. Political decisions stem from the will of the majority which is expressed in the free election system. The decision of the majority is concerned with the protection of minorities.

53. The number of political parties at the national level is still growing. The numbers for each in individual years are shown in the following table:

Year	Number of political parties
2001	108
2002	118
2003	121
2004	123
2005	129
2006	139
2008	141

Proportional representation of the population eligible to vote

54. Between 2000 and 2008 there was a number of elections conducted namely for the Chamber of Deputies of Parliament of the Czech Republic (2002, 2006), elections for the Senate of the Czech Parliament (2000, 2002, 2004, 2006 and 2008), elections for the Municipal Councils (2002 a 2006), elections for the Regional Council (2000, 2004 and 2008) and elections for the European Parliament (2004).

55. The right to vote, for the Chamber of Deputies and the Senate of Parliament of the Czech Republic was given to the citizens of the Czech Republic who reached the age of 18 years at least on the day of the election and without an obstacle stated by the law in the exercise of the voting right. The elector was able to exercise the voting right on the basis of a polling card in any of the polling stations within the constituency, as long as the constituency in which the elector has been added to the permanent list of electors belonged to the same constituency of the running election. The proportion of electors eligible to vote for Parliament of the Czech Republic was approximately 81%.

56. The right to vote for the European Parliament in the Czech Republic was given to the Czech citizens who reached the minimum age of 18 at least in the second day of the elections and citizens of other Member States who reached the minimum age of 18 at least in the second day of elections and were registered at least 45 days in the evidence of the population, (with the exception of people who encountered an obstacle in the exercise of voting right according to the

voting law). The proportion of electors eligible to vote for the European Parliament was approximately 81 %.

57. The right to vote for the Regional Councils was given to those citizens of the Czech Republic who reached the minimum age of 18 at least on the second day of the elections and there was no obstacle to the exercise of their voting right according to law. The right to vote could be exercised only in the area of the constituency where the elector has permanent residency and where he or she is registered on the list of permanent electors. The proportion of eligible electors for the Regional Councils was approximately 71%.

58. The right to vote for the Municipal Councils was given to those citizens of the Czech Republic, with registered permanent residency within the constituency, with no obstacle to the exercise of the voting right who reached the minimum age of 18 at least on the day of election, and to the members of another state with the right to vote which has been approved by valid international agreement with the Czech Republic, while fulfilling the same conditions as stated for Czech citizens. Similar conditions were implemented in the case of voting right for the town Council or the part of the town or town district, with the condition of the permanent residency of the elector within the constituency. There is no central evidence of the number of eligible electors for the Municipal Councils.

The proportion of non-citizens registered on the electoral lists

59. In accordance with the Paragraph 28 Section 1 Act No. 491/2001 Coll., On Elections to Municipal Council, as amended, the electoral list may contain the name of an elector who is not a citizen of the Czech Republic if the elector is able to show evidence of citizenship of another country which gives the right to vote to the elector according to the international agreement which is also acknowledged by the Czech Republic and which is contained in the International Agreements Collection, and the evidence of the permanent residency in the place of the elections. At present, such an international treaty is only the Treaty of Accession of the Czech Republic to the European Union. Therefore the right to vote for the Municipal Council is available only to a foreigner who is a citizen of one of the EU Member States and fulfills other conditions specified by law (aged at least 18 years and with permanent residency within the constituency). There is no central evidence of the total number of foreign electors because the supplement lists of permanent electors is managed by individual Municipal Councils only.

60. The citizens of other EU Member States are able to vote in the Czech Republic for the European Parliament. The evidence shows that 99 citizens of other EU Member States participated in the elections for the European Parliament in the Czech Republic in 2004.²⁰ The total number of citizens of other European Member States that were registered for the elections for the EU Parliament is also unavailable as the data is managed by the individual Municipal Councils.

The number of complaints on the management of the election process

61. The administration as well as the legal aspect of the election process is carefully researched. The complaints of the organisation and technical nature of the election management on the Regional level is dealt with by the Ministry of the Interior. Complaints of a similar nature on the Municipal level are dealt with by the Regional Councils. Statistics regarding these complaints are not recorded. A judicial review of the elections is executed by the Supreme Administrative Court of the Czech Republic and the Regional Courts.

Elections for the Chamber of Deputies of Parliament of the Czech Republic in 2006

62. The Supreme Administrative Court received in total 70 complaints on elections for the Chamber of Deputies, 4 of which were submitted late. From the remaining 66 complaints, 66 were submitted by individuals and 6 by political parties. The Electoral Senate consisting of 7 members rejected 33 complaints and 22 complaints were refused.²¹ For the purpose of this report, the number of rejected complaints included the ones which were partly dismissed and at the same time partly rejected. The rest of the 15 causes were dealt with in a different manner because they were no longer considered as election complaints according to the election law.

63. Complaints were concerned with the accuracy of the election campaign and the manner of the election media presentation as well as the election law in relation to the conversion of votes to mandates. Finally there were also complaints about the access to voting process and doubts about the accuracy of the calculation of votes.

Elections for the Municipal Councils and for the Senate of Parliament 2006

²⁰ According to data of the Ministry of the Interior

²¹ The Court may refuse an application without a formal investigation when the formal requirements are not fulfilled. The Court may reject the complaint if the cause is not justified.

64. The Supreme Administrative Court received 12 complaints in total on the election process in the election matters. The 5 complaints directed against the elections for the Senate of Parliament of the Czech Republic doubted the just election of certain candidates.

Population coverage and specification of the ownership of the main Media channels

65. The publishing of the periodical press in the Czech Republic is based on freedom of information and therefore is not tied by the regulation control of the state. The Ministry of Culture only keeps evidence of the press released and distributed in the Czech Republic including the information on publishers and some details about the published titles. This evidence is in the form of a public access database on the web pages of the Ministry of Culture. Periodicals are issued and distributed at a national scale or only within the individual regions. The national press has around 10,804 titles and regional 3,370 titles. The evidence of the periodicals only contains the publisher of a title. The actual owner of the publishing company is not and cannot be traced by the Ministry of Culture by law.

66. In the case of the Radio broadcast, the public service operator is by law the Czech Radio. The Station-wide broadcast of Czech Radio stations which are available in almost all parts of the country are: Czech Radio 1 – Radio journal, Czech Radio 2 – Prague, Czech Radio 3 – Vltava and Czech Radio 6. Apart from those stations Czech Radio operates Regional broadcast through 12 stations. As well as the public service broadcast in the Czech Republic there are national and regional commercial Radio programmes with monitored ownership by the Board of Radio and Television Broadcast.

67. The public service operator of television broadcasting is the Czech Television which at present operates 2 analogue channels and 2 digital channels: ČT 4 – Sport and ČT 24. These station-wide programmes have a coverage of at least 95% of the population of the country. A Station-wide commercial broadcast is offered by the programmes NOVA TV and PRIMA TV. There are also many station-wide and regional operators of television broadcasting through cable and satellite as well as operators of other programme licences. There is a transfer to digital television broadcast at present which will significantly broaden the possibilities and number of programmes.

The chair distribution in Parliament

The Chamber of Deputies of the Parliament of the Czech Republic after 2002 and 2006 elections

68. In 2002 elections, The Czech Social-Democratic Party (ČSSD) received the highest amount of chairs (70), followed by The Civic Democratic Party (ODS) with 58 mandates, The Communist Party of Bohemia and Moravia (KSČM) with 41 chairs and the last was the coalition of the Christian and Democratic Union – The Czechoslovak People's Party and The Freedom Union – The Democratic Union (KDU-ČSL US-DEU) with 31 mandates.

69. In 2006 elections, the winner was The Civic Democratic Party (ODS) with 81 chairs, followed by The Czech Social-Democratic Party (ČSSD) with 74 mandates, The Communist Party of Bohemia and Moravia (KSČM) with 26 mandates. The Christian and Democratic Union – The Czechoslovak People's Party received 13 mandates. The Green Party (SZ) historically for the first time received Parliament membership with 6 mandates. The next elections for the Chamber of Deputies are planned for the year 2010.

Elections for the Senate of Parliament of the Czech Republic

70. In 1996 in the first round of elections one third of senators was elected for 2 years, one third for 4 years and one third for 6 years. In 1998 the second round of election was held in one third of the election districts. The length of the mandate of all the senators in the second round of the election process is 6 years. After elections in 2000, ODS with 25 chairs was the strongest party in the Senate, followed by KDU – ČSL and ČSSD with 13 chairs (10 mandates). KSČM had 3 senators. 23 senators had no involvement in political parties. 7 other chairs were divided amongst the smaller parties.

71. In 2002 – 2004 ODS was still getting stronger in the Senate with 35 mandates. The second strongest party was KDU – ČSL with 12 chairs. ČSSD received 6 mandates and KSČM received 2 mandates. The independent senators received 19 chairs. Other minor parties shared 7 chairs.

72. ODS had success in the following elections for the Senate with a large representation of senators. In 2004 – 2006 ODS had 39 senators, the second strongest party was ČSSD with 11 chairs, then KDU – ČSL with 9 mandates. The Communists had 2 chairs and 16 senators with no political involvement. Other minor parties shared 4 mandates.

73. In 2006 elections ODS received absolute majority of 41 chairs in the Senate, followed by ČSSD with 12 senators and KDU – ČSL with 11 senators. The Communist Party had the least number of senators (2). The independent candidates managed to receive 15 chairs. In 2008 The ODS again received the majority of chairs in the Senate (35), followed by ČSSD with 29 chairs, KDU-ČSL received 7 chairs. The Communist Party again received the least number of chairs (3).

The proportion of women in political and administrative posts

74. The number of women in the Chamber of Deputies with the 200 membership representation decreased from the previous 34 to the present number of 31 (15.5%). After the second round of the elections for the Senate in autumn 2006 women received 12 chairs (14%) from the total of 81 chairs and after the election in the Autumn 2008 it was 14 chairs. There is not a single woman amongst the 12 governors. The statutory Committees have 19% women representatives and the Councils only 12% women.

75. The table²² indicates the development of the number of women members in the lower house of Parliament:

Party	Elections 2002 Number of women members	Elections 2002 Proportion of women members	Elections 2006 Number of women members	Elections 2006 Proportion of women members	Increase/decrease against the previous period
ODS	8	14 %	9	11 %	+1
KDU-ČSL	2	9.5 %	2	15 %	0
SZ*	-	-	3	50 %	+ 3
ČSSD	11	14 %	9	12 %	- 2
KSCM *	12	29 %	8	31 %	- 4
Total	34	17 %	31	15.5 %	- 3

* The party operates according to quota or allocation for arranging the lists of candidates.

The proportion of national and municipal elections

76. Between the years 2000 and 2008 there were 2 elections in the Czech Republic for the Chamber of Deputies of Parliament of the Czech Republic (2002, 2006) and 4 elections for the Senate of Parliament of the Czech Republic (2002, 2004, 2006 and 2008). For the first time there were elections for the European Parliament (2004). On the local level there were 2 elections for

²² Source: Forum 50%, Article 'Czech women deputies are becoming endangered species: female representation in the newly elected Chamber of Deputies', Authors: Lenka Bennerová and Jana Smiggels Kavková.

the Municipal Councils (2002 and 2006) and elections for the Regional Councils (2000, 2004 and 2008).

Average elector participation in the National and Local elections according to Administrative Districts

77. The highest average participation is traditionally in elections for the Chamber of Deputies of Parliament (between 58%). The Municipal Council elections have also high elector participation (46%). Elections for the European Parliament have a lower elector participation (around 30%), as well as the Regional Council elections and the first round of elections for the Senate. Elector participation in the second round of elections is around 20%, with the exception of the year 2002, when in the second round voted more than 30% of electors.

78. The elector participation according to administrative districts is presented in the supplements.

Approval of non-government and non-profit making organisations

79. Amongst the non-government and non-profit making organisations are in particular the Civic associations. Civic associations are founded in accordance with Act No.83/1990 Coll., On Association of Citizens, as amended. In accordance with law it is possible to found associations, companies, unions, movements, clubs and other civic associations as well as trade unions and employer organisations.

80. Association becomes a legal body by registering at the Ministry of the Interior. There are special conditions for the registration process. The registration process begins on the day when the Ministry of the Interior receives the application for registration which has no fault in it. If the application has not fulfilled the stipulated conditions the Ministry of the Interior will inform the preparatory committee about this fact and that it is not possible to begin the registration process until the faults in the application are removed. If there are no reasons for rejection of the registration application the Ministry of the Interior will complete the registration within 10 days from the beginning of the registration process. If the Ministry of the Interior finds the legal cause

for the rejection of the application²³ the preparatory committee may submit an appeal against the decision of the Ministry of the Interior to the Municipal Court in Prague within 60 days of receiving the decision.

81. As a means of protection against the case of no action by the Ministry of the Interior the law on Association of citizens allows the creation of association by law in case when the preparatory committee does not receive the decision of rejection of the application within 40 days of the beginning of the application proceedings. In that case the date of the registration becomes the following date after the 40 day period.

82. The engrossment of statutes is completed once on the day of registration. The application for the registration submits the preparatory committee consisting of at least 3 persons from which at least one should be 18 years old. Essential part of the application for registration is the complete version of the statutes in two copies which must contain all the conditions stipulated by law.

83. In accordance with Act No. 83/1990 Coll. in case of founding an association there is not 'index of associations' in form of a public list. On the basis of duty of the Ministry of the Interior to submit information the evidence of associations is kept by the Czech Statistical Office. The database containing title and residence of associations can be found on website of the Ministry of the Interior.

84. 74,090 associations were present in the database on 31.12. 2008.

85. Non-government and non-profit making organisations are also Public benefit organisations, Foundations and Funding organisations.

86. Public benefit organisations are legal bodies and they offer beneficial services for the public on the basis of set conditions which are equal for all the users. Net profit cannot be used for the personal benefit by anyone including the founders of the project, members or employees. In accordance with law the profit must be used on offering the services which are stipulated in the original document of the organisation. Public benefit organisations are registered in the index of the Regional Courts according to the residence of the organisation.

²³ The concern is for example with not allowed associations in the sense of Paragraph 4 Act On Association of citizens, association in order to deny or restrict the personal, political or other rights of the citizens due to their nationality, gender, origin, political or other views, religious belief and social status, arouse hatred and intolerance for these reasons, promote violence, or otherwise violate Constitution and other laws, or association which follows their objectives in the way which is inconsistent with Constitution and laws or the association is armed or with armed services.

87. Foundations and Funding organisations are associations of capital collection set up for the purpose of public benefit objectives. Funding organisations may use the capital and other funds for the purpose of achieving their objectives. The total of the foundation capital (minimum of CZK 500,000) must not fall below this minimum amount during the whole period of existence of the Foundation. Funding organisation funds on the other hand may use all of the capital for the individual purpose.

Organisations with an international element

88. Organisation with an international element is according to Paragraph 1 Section 2 Act No. 116/1985 Coll., nn the conditions of organisations with an international element in the Czechoslovak Socialist Republic, as amended by Act No. 342/2006 Coll., an international non-government organisation. In accordance with Paragraph 6 of the law it is possible to establish special organisation for representation of interests of the Czech Republic. On the basis of law Ministry of the Interior may approve the establishment of international non-government organisation or allow the organisation to operate or have residence in the Czech Republic.

89. In the case of the requirement for an approval of existing international non-government organisation to operate or to have residence in the Czech Republic such an organisation must add to the application a document showing evidence that it has been established as a legal body and the statutes stipulated by law. The documents submitted must be legally attested and legally translated into the Czech language. The proposal of statutes must be added to the application in case of the issue of establishment of a new international non-government organisation.

90. Approval is possible to issue after an agreement has been reached with the Ministry of Foreign Affairs and after the agreement of the appropriate central administrative office.

91. Application for the approval of the establishment of the organisation with an international element or approval of such an organisation to operate or to reside in the Czech Republic in accordance with Act No. 116/1985 Coll., such an organisation may be rejected in the case that its statutes, the application proposal and its operation are not consistent with the legislation of the Czech Republic, or if the organisation is not a legal body and if there are any other important reasons which prevent the establishment of the organisation by law.

92. 208 organisations received approval up until the date 31.12.2006.

The Judicial system

93. The basic rights and freedoms are in accordance with the Article 4 of the Constitution under the protection of the judicial power. The judicial power is executed by independent courts in the name of the Republic. The judges are independent in their office. The post of a judge is not consistent with a post of the President, Member of Parliament or any other position in public administration sector. The law stipulates other activities that are inconsistent with the post of a judge.²⁴

94. Courts have a duty to provide legal protection of the rights. The court is the only body which makes decisions on conviction and punishments for an offence. The system of courts is formed by the Supreme Court, the Supreme Administrative Court, the High Courts, the Regional and the District Courts. The law on courts and judges states the function and organisation of a court. The judge is appointed by the president of the Republic with no time limit. The judge is tied by law in making decisions. All the participants in court proceedings have equal rights. The court proceedings are oral and public and exceptions are stated by law. The judgment is always announced in public.

1. 95. In both civilian and criminal proceedings the rule of two-instances applies. This means that if the judgment has been reached in the case proceedings by the court of the first instance which is usually the District Court, appeal against this decision is heard and decided by the court of second instance and application for regular remedial measure against this decision cannot be filed.. In certain cases stipulated by law, the Regional Court decides as the court of first instance and High Court is then the court of second instance (this is the case with e.g. serious criminal offences.).

2. 96. The Supreme Administrative Court is the supreme judicial body in matters that belong to the jurisdiction of administrative courts. The Supreme Administrative Court ensures the unity and legality of judgments related to administrative judicial system – decides on cassation complaints²⁵ and monitors and evaluates final decisions of regional courts and takes views.

²⁴ Act No. 335/1991 Coll., On courts and judges, as amended.

²⁵ Appeal in cassation is a lawful act against the jurisdiction of the Regional Court in the administrative judicial system by which the person involved in the proceedings or the person associated with the proceedings seeks to repeal a court decision. Appeal in cassation is possible against every court decision as long as the law does not specify otherwise. Appeal in cassation is possible to submit only for the law related reasons especially for reason of the claimed judicial fault of the judgment of the previous proceeding.

97. The special position has the Constitutional Court of the Czech Republic²⁶ which is an independent judicial body for a protection of the Constitution that stands apart from the rest of the judicial system. The Constitutional Court consists of 15 judges appointed by the President of the Republic for the period of 10 years.

98. The Constitutional Court is the final body of the judicial system which may be able to correct the jurisdiction of interior offices, in particular the District Courts. In the case of confrontation of international and interior law, the Constitutional Court applies in its jurisdiction the international and regional (European) Conventions on Human Rights, especially The International Covenant on Civil and Political Rights, The International Covenant on Economic, Social and Cultural Rights, The Convention on the Rights of the Child, and The Convention on Protection of the Fundamental Human Rights and Basic Freedoms, as amended. The Constitutional Court may abolish laws or parts of the law which are inconsistent with the constitutional order of the Czech Republic, in particular the Constitutional Charter, or the international agreement. The abolishment of the legal standard or its part in relation to its sole inconsistency with an international agreement is within the present jurisdiction of the Constitutional Court quite a rare occurrence.

99. The law states who and under what conditions is justified to submit the proposal to initiate proceedings and other rules of the proceedings before the Constitutional Court. Judges of the Constitutional Court are bound in their jurisdiction only by the constitutional law, international agreements according to the Article 10 of the Constitution of the Czech Republic and the law on Constitutional Court and its proceedings. Enforceable judgments of the Constitutional Court are binding for all legal bodies and persons.

100. The Prosecuting Attorney's Office²⁷ brings an action for the criminal proceedings in the name of the State and fulfills the duties according to judicial order²⁸, and fulfills other judicial duties, for example the Civil Procedure Code²⁹. The system of the Prosecuting Attorney's Office is formed by the Attorney's general Office, the High Prosecuting Attorney's Office, the Regional and the District Prosecuting Attorney's Office.

²⁶ Act No. 182/1993 Coll., On the Constitutional Court, as amended.

²⁷ Act No. 283/1993 Coll., On Prosecuting Attorney's Office, as amended.

²⁸ Act No. 141/1961 Coll., On Judicial Criminal Proceeding (Criminal Procedure), as amended.

²⁹ Act No. 99/1963 Coll., On Civil Procedure Code, as amended.

Information on judicial acts (data on criminal offences and information on offenders and victims)

101. Capital punishment was abolished in the Czech Republic in 1990 by amendment of Act No. 175/1990 Coll.

102. In the Czech Republic 75,728 offenders were sentenced for criminal offences up until 31.12. 2007, 12.0% of this figure were women. Within the various age groups of the accused and sentenced there are particular differences. The age group 9–21 years yields a relatively higher number of accused cases amongst men and women, almost a tenth, than the number of convicted cases, 3.6% men and only 1.6% women. After the age of 30 both sexes show a higher number of convictions rather than the similar age groups of the convicted cases.

103. Amongst the victims of criminal offences dominated men, approximately 55%. Groups of people were victims to criminal offences in 9.6% of cases. The most common criminal offences were grievous bodily harm (32.0%), followed by robbery (26.6%), dangerous or threatening behaviour (12.4%) and blackmail (7.9%).

104. Amongst the male victims the most common offence was the grievous bodily harm (42.8%), followed by robbery (26.6%), blackmail (9.2%) and dangerous or threatening behaviour (7.2%).

105. Amongst the female victims the most common offence was robbery (25.6%), followed by grievous bodily harm (21.3%) and dangerous or threatening behaviour (16.9%), sexual abuse (8.7%), rape (6.8%) and blackmail (6.4%).

106. In the Czech Republic 4,613 victims of robbery were recorded in 2006, 1,676 of this figure were women victims. In comparison with the year 2000 the number of female victims of robbery increased by approximately 10%. The number of female victims of sexual abuse also increased in comparison with the year 2000. The number of female victims of murder increased from 26.7% to 45.3% between 2000-2002 but then until 2005 the number of female victims of murder decreased to 34.5%.

107. Total number of people in detention and in custody between 2000 -2006 are shown in the following table:³⁰

³⁰ The number of detained and custody cases are statistically recorded only in terms of the total numbers without the specification of different offences, always up to 31st December of each year. The tables show the numbers of custody cases as the accused. Detained are the persons in exercise of the custodial sentence shown as convicted.

Statistics show in both adult and youth categories separately the numbers of women and men. In accordance with Act No. 218/2003 Coll., On the liability of youth for unlawful acts and youth justice matters, as amended (Law on the judiciary in matters of youth) the person older than 18 but younger than 19 years may be included in the exercise of the custodial sentence of youth. The total numbers of convicted youth therefore include persons which are no longer considered children according to the Article 1 Convention On the Rights of the Child.

The proportion of detained in custody to 100,000 inhabitants:³¹

Figure from Year	The number of detained persons to every 100, 000 inhabitants
2000	209
2001	188
2002	159
2003	169
2004	180
2005	125
2006	181

Summary of the average lengths of court detention in days in the Czech Republic (period from 2002 to 2006))³²

Figures from Year	2002	2003	2004	2005	2006
Number of detentions	7, 214	6, 600	6, 262	5, 847	5, 618
Average length (in days)	375	400	324	298	311

³¹ The figure of 100,000 inhabitants is monitored only in the category of detained persons in custody , this table shows detained cases and cases in the exercise of custodial sentence, again without distinguishing the type of offence they were detained or sentenced for.

³² The court detention is monitored only in terms of the average length, that is the length of time in which the case is investigated by courts. The preparatory case proceedings are not available. The information provided is from 2002.

2. General Framework for the Protection and Support of Human Rights

C. Acceptance of International Conventions on Human Rights and Freedoms

108. The Czech legislation made one reservation in relation to the Human Rights Agreements in particular in the case of the Convention on the Rights of the Child issued by UN. The provision is described in more detail in the Third and Fourth Periodical Report on the fulfilment of commitments which stem from the Convention on the Rights of the Child which has been given

³⁴ Death in detention (accusation) and death in custody (conviction) are monitored for men, women and youth in individual years. The suicides are monitored separately.

to the UN Committee for the Rights of a Child in 2008. The Czech legislation made another reservation in relation to the European Convention for the Protection of Human Rights and Fundamental Freedoms issued by the European Council in particular the Article 5 and 6. The reservation by the Czech legislation states that this provision does not prevent the legal custodial punishment in accordance with an Act on certain conditions of employment of soldiers (Act No. 76/1959 Coll).³⁵

109. The Czech Republic is the Contracting Party of the following International Agreements on human rights:

- a) The International Convention on the Elimination of All Forms of Racial Discrimination.
- b) The International Covenant on Civil and Political Rights, including the Optional Protocol to The International Covenant on Civil and Political Rights, second Optional Protocol to The International Covenant on Civil and Political Rights regarding Capital punishment.
- c) The International Covenant on Economic, Social and Cultural Rights.
- d) The Convention on the Elimination of All Forms of Discrimination Against Women.
- d) The Convention on the Rights of the Child, including the Optional Protocol on Involvement of Children in Armed Conflict.
- e) The Convention for the Protection of Human Rights and Fundamental Freedoms and the related Protocols.
- f) The Convention Against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment, including the Optional Protocol to The Convention Against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment.
- g) Framework Conventions for the Protection of National Minorities.
- h) European Social Charters and related Protocols ratified by the Czech Republic (as specified in the footnote below).

110. Texts of the ratified International Conventions are published in the Czech language in the Collection of Laws.³⁶ Texts of the introductory and periodical information documents on

³⁵ Section 17 Act No. 76/1959 Coll., On certain conditions of employment of soldiers.

³⁶ International Conventions of the UN published in the Collection of Laws:

International Covenant on Civil and Political Rights (ICCPR): Act No. 120/1976 Coll.

International Covenant on Economic, Social and Cultural Rights (ICESCR): Act No. 120/1976 Coll.

International Convention on the Elimination of All Forms of Racial Discrimination (CERD): Act No. 95/1974 Coll.

Convention on the Elimination of All Forms of Discrimination Against Women (CEDAW): Act. No. 62/1987 Coll.

Convention Against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment (CAT): Act No. 143/1988 Coll. and 39/1997 Coll. (Provision repeat of the first ratification of the selected Articles)

fulfilment of resolutions which stem from International Covenants and Conventions are published on the internet.

111. The significant feature of the Czech legal order is the Constitutional principle, Article 10 Constitution of the Czech Republic, by which International Agreements are issued, ratified and which are approved by Parliament. The Czech Republic is legally bound by International Agreements and they are part of the legal order; in the case that the International Agreement states something apart from law it becomes valid.

112. As a Contracting Party of The Convention for the Protection of Human Rights and Fundamental Freedoms the Czech Republic approves the jurisdiction of the European Court of Human Rights. The Court makes the decision on complaints of persons, non-government organisations and groups regarding alleged violations of rights and freedoms which are guaranteed by the Convention. The decisions of the Court are legally binding for the Czech Republic. The decision process of the Court is under supervision of the Committee of Ministers of the Council of Europe.

D. The Legal Framework for the Protection of Human Rights at the National Level

113. The Czech Republic is in accordance with the Constitution, a sovereign, unitary and democratic state based on the respect of the rights and freedoms of individuals and citizens. Every citizen may act in a way which is not prevented by law and no one can be forced to act in a way that the law does not require. The fundamental rights and freedoms are under the protection of the judicial power. The Constitutional Order in accordance with Article 3 of the Constitution,

Convention on the Rights of the Child (CRC): Act No. 104/1991 Coll.

International Convention for the Protection of the Rights of All Migrant Workers and Members of Their Families has not yet been ratified by the Czech Republic.

International Conventions of the EU Council:

Convention for the Protection of Human Rights and Fundamental Freedoms, including Protocols. Published in Collection of Laws, Act No. 209/1992 Coll., as amended by Act No. 41/1996 Coll. and Act No. 243/1998 Coll.

Framework Convention for the Protection of National Minorities: Provision, Act No. 96/1998 Coll.

European Social Charter: the Government expressed an agreement with the proposal of the Minister of Labour and Social Affairs on 25th November 1998 resolution No. 776 regarding ratification of the European Social Charter (1961), Protocol on the European Social Charter (1988), Amended Protocol of the European Social Charter (1991) and the signing of the Agreement of the revised European Social Charter (1996) with Provision of ratification.

Chamber of Deputies approved the Charter in July 1999, Senate approved in August of the same year. Ratification documents are kept by the Secretary General of the Council of Europe.

also contains the Charter of Fundamental Rights and Freedoms.³⁷ The Charter respects the inviolability of fundamental human rights, citizen rights and the sovereignty of law.

114. The Charter introduces into the Constitutional Order most of the provisions stated in the International Covenant on Civil and Political Rights and the International Covenant on Economic, Social and Cultural Rights. The act of introduction of the Charter into the Constitutional Order of the Czech Republic ensured that all relevant Provisions of the two Covenants are also included in the Czech legislation. Apart from that according to the constitutional law³⁸ the Czech Republic accepted all the obligations which were relevant for the Czechoslovak federative republic up to its disappearance from the international law, apart from the obligations related to the territory which are not under the sovereignty of the Czech Republic. This act ensured the continuity of the observance of all the obligations of the former Federation and the Czech Republic and beyond the framework of the obligations which stem from the Charter.

115. The principal protection of the rights guaranteed by international agreements is secured by the Courts in the Czech Republic. In accordance with the Article 36 Section 1, Charter, everyone is entitled to assert their individual rights according to law at the independent and impartial Courts and the specific cases at other legal institutions. Anyone who believes that their rights have been unfairly treated by the decision of public authorities may ask the Court to investigate the legality of such a decision if the law does not state otherwise. Above all the jurisdiction of the Court does not exclude investigation of decisions related to the fundamental rights and freedoms guaranteed by the Charter. The Charter also amends the right on the compensation for damages caused by unlawful decision of the Court, another Government or public authority or the incorrect legal procedure.

116. Legal Standards related to human rights and fundamental freedoms are contained in the Constitution of the Czech Republic and the Charter as well as in the Material Civil Law and the Procedural Civil Law, the Criminal Law and the Administrative Law (the Civil Code and the

³⁷ Act No. 2/1993 Coll., On Declaration of the Charter of Fundamental Rights and Freedoms as part of the Constitutional Order of the Czech Republic, as amended.

³⁸ Act No. 4/1993 Coll., On measures related to the disappearance of the Czech and Slovak Federative Republic.

Code of Civil Procedure, the Criminal Law and the Code of Criminal Procedure, the Administrative Code)³⁹ and other Legal procedures.

117. All of the Constitutional Laws, the legal and the administrative Codes valid in the Czech Republic including the documents of the ratified International Agreements are announced in the Collection of Laws and published with the commentary and references of the judicial literature.⁴⁰

118. The protection of rights in the sense of the Article 2, International Covenant on Civil and Political Rights and the Articles 2 and 4, International Covenant on Economic, Social and Cultural Rights is safeguarded by means of Constitutional complaints which may be submitted to the Constitutional Court by:

a) an individual or legal body against the final decision or other provision of a public administration if they believe that the fundamental rights and freedoms, which are protected by the Constitutional Law or the International Convention for the Protection of Human Rights and Fundamental Freedoms by which The Czech Republic is legally bound, have been violated.

b) Municipal Authorities against unlawful Government action.

c) A political party against the decision on its dissolution or other decision which is not in compliance with the Constitution or the unlawful decision on its activity.

Along with the Constitutional complaint the legal action for abolishment of legislation or of its part may be lodged if the cause of the legal action is due to the fact that such legislation has been implemented and thereby caused a situation in which the constitutionally or internationally guaranteed rights and freedoms have been violated.

E. Institutions created for the purpose of protection and support of human rights

119. In 1998 the Government established the post of a Government Commissioner for Human Rights.⁴¹ The key institutional measure for the improvement of the current situation and at the same time a reaction to the demands of International organisations regarding the institutional

³⁹ Act No. 40/1964 Coll., Civil Code, as amended. Act No. 99/1963 Coll., Code of Civil Procedure, as amended. Act No. 140/1961 Coll., Criminal Code, as amended. Act No. 141/1961 Coll., On the judicial criminal proceedings (Criminal Law), as amended. Act No. 71/1967 Coll., On Administrative procedure (Administrative Code), as amended.

⁴⁰ Since 1st January 2000 is the publishing of legal documents amended by Act No. 309/1999 Coll., On Collection of Laws and Collection of International Agreements. In the Collection of International Agreements are International Agreements announced in the language which is decisive for the international interpretation and the translation into the Czech language.

⁴¹ Resolution of the Government of the Czech Republic from 9th September 1998, No. 579.

security of the protection of human rights in the country, was the creation of The Government Council of the Czech Republic for Human Rights.⁴² The Council is an advisory and coordination body of the Czech Government for questions on protection of human rights and fundamental freedoms of individuals within the jurisdiction of the Czech Republic. The Council has made provisions for the cooperation with non-government and non-profit making organisations and the Council is formed by representatives of the non-profit sector and Representatives of the Public and the Government Administration. The Chairman of the Council is a Government Commissioner for Human Rights.

120. In the same period the resolutions have been implemented for the establishment of the following new advisory bodies for the purpose of protection and support of human rights. The Government Council for National Minorities gives support to the cultural activities of the members of National Minorities. The Council is an advisory and Governmental initiative body for the questions relating to National Minorities and their members.⁴³

121. In 2001 the Government founded the Government Council for Equal Opportunities for Men and Women which prepares proposals for assertion and achievement of equal opportunities for men and women. The Council in particular processes and recommends the basic conceptual directions for the Government procedure in the implementation of equal opportunities for men and women.⁴⁴

122. In 2003 the Government issued the Government Council for Sustainable Development as a permanent advisory, initiative and coordination body for the area of sustainable development and strategic management.⁴⁵

123. In 2006 the Government established the Government Council for the Senior and Elderly Population.⁴⁶ The Council was established to create an environment for the healthy, active and dignified aging of the population, equal opportunities for senior citizens in all areas of life,

⁴² Resolution of the Government of the Czech Republic form 9th December 1998, No. 809, for the improvement of the Protection of Human Rights of the Czech Republic (to the 50th Anniversary of signing the Universal Declaration of Human Rights).

⁴³ The Council has been issued by Act No. 273/2001 Coll., On Rights of the Members of National Minorities.

⁴⁴ The Council also coordinates the basic direction of conceptions of equal opportunities for men and women in various administrative departments, issues the range of priorities for projects for support of realisation of equal opportunities for men and women and identifies the current issues related to equal opportunities in the society.

⁴⁵ Resolution of the Government of the Czech Republic No. 778 from 30th July 2003. The Council was approved by the Government Act No. 836 from 6th March 2003.

⁴⁶ Resolution of the Government of the Czech Republic No. 288 from 22nd March 2006.

protection of their human rights and the development of inter-generational relationships in the family and in society.

124. The Government Council for Roma Community Affairs has been established to encourage the implementation of human rights by Roma Community who are more vulnerable to discrimination, social exclusion and poverty in comparison to other ethnic groups.⁴⁷ The purpose of the Council is to help the integration of the Roma Community into the society and to ensure their equal opportunities.

125. Since 2007 the office of Human Rights and National Minorities is managed by the Minister of Human Rights and National Minorities.

126. In January 2008 was established the Agency for Social Inclusion in the Roma Localities which aims to improve the living conditions of inhabitants in these localities, to stop the growing number of Roma ghettos and set up the most effective model for the access of finances from the European funds for integration of the Roma Community.

127. The Protection of human rights and fulfilment of the obligations which stem from the International Agreements, is the responsibility of Committees and Commissions of both Chambers of Parliament of the Czech Republic:

- The Petition Committee of the Chamber of Parliament which has two other Committees – The Committee for Application of the Charter of Fundamental Human Rights and Freedoms and The Committee for Nationalities.
- The Permanent Committee for equal opportunities,
- The Committee for Education, Science, Culture, Human Rights and Petitions of the Senate of Parliament.

Distribution of information on the application of Human Rights

128. The introduction and periodical information on human rights including the final recommendations of the UN Committees are available to the public in both Czech and English version on the web pages of the Government Office (www.vlada.cz) – in the section of the Government Council for Human Rights and the section of the Government Resolutions.

⁴⁷ Resolution of the Government of the Czech Republic No. 581 from 17th September 1997, then as the Interdepartmental Commission for the Roma Community Affairs, in 2001 renamed to the Council for Roma Community Affairs. Its activity is amended by law, accepted by the Resolution of the Government of the Czech Republic No. 10 from 28th January 2004.

Increase of the awareness of human rights amongst officials and other professions

129. Government officials who are involved with the issue of human rights at the beginning of their post will complete the initial educational course which also includes qualifications in the subject of human rights. After the initial course the employees will attend courses which are more specifically on human rights. Employees also take part in other seminars which are more practical in order to broaden their knowledge and keep in touch with the current development of the issue. These seminars are arranged by the appropriate departments as well as by non-government organisations.

Encouragement of the awareness of human rights through educational programmes and Government financed public information campaigns

130. The Secretariat of the Government of the Czech Republic for Human Rights ensures communication and cooperation between the Government Commissioner for Human Rights and Government Administration and Councils, organisations operating in public sector and other institutions, in particular the Ombudsman office. The Secretariat also manages awareness and education activities in relation to the protection of human rights, for example the Secretariat organises the Government Campaign against racism each year.

131. In 2003 the Secretariat of the Council of the Government of the Czech Republic for Human Rights organised the Campaign on the unacceptability of domestic violence.

132. The Government also finances a number of other awareness activities. The realisation happens on the level of the individual Ministries (the Ministry of the Interior, the Ministry of Labour and Social Affairs, the Ministry of Education, Youth and Sports) or in the form of support of the activities of the non-government organisations.

Role of the Civil society including the non-government and non-profit making organisations

133. The Czech Republic provides the financial means to the Civil Society Development Foundation which gives help to endangered and disadvantaged groups, protects human rights, democratic values, contributes to the living in tolerance of the national minorities in the society or otherwise encourages the public interest in matters of local development and public life. The chief objective of the Foundation is to provide funding for individual grant programmes of the

specific non-government and non-profit making organisations projects registered in the Czech Republic, for example Civil Associations, Public Benefit organisations and churches. Between 1999-2007 CZK 2.422 billion have been distributed from the Investment Foundation amongst seventy three Foundations.

134. The important mechanism for cooperation between the Government Administration and non-government organisations in the area of human rights is the Council of the Government of the Czech Republic for Human Rights and its Committees. The Council also participate in the preparation of the periodical information regarding the fulfilment of the International obligations in the area of human rights.

Development Cooperation and Support

135. The Czech Republic definitely ceased to be the recipient of international development cooperation for the support of human rights after entry into the EU. The Czech Republic now offers development cooperation abroad.

136. The Czech Republic supports democracy and human rights in developing and transforming countries in the form of transformation cooperation. The focus is on the establishment and strengthening of democratic institutions, legislation of the state, civil society and implementation of the principles of correct administration of public affairs - 'good governance'. Transformation cooperation is implemented in particular through: educational projects, information distribution, sharing of views and experience with a non-violent rejection of totalitarian systems in the process of social transformation. In 2004 the Program of Transformation Cooperation was established for this purpose. Since 2005 the Program operates with an annual budget. The objectives of the Program are defined in the Conception of the Transformation Cooperation which states the following priority countries: Belarus, Bosnia and Herzegovina, Georgia, Iraq, Cuba, Moldavia, Myanmar/Burma, Serbia and Ukraine.

137. 22 projects and individual activities were realised with CZK 7.56 million in 2005, 55 projects and individual activities with CZK 47.221 million in 2006 and 17 projects were realised in 2007.

138. The chief objective of the development cooperation – reducing poverty in the development countries – stems from the Conception of the Foreign Development Support of the Czech Republic for the period 2002-2007. The Czech Republic in the Conception promotes democracy, human rights and social justice, the integration of developing countries into the world economic system and sustainable global development. International statistics on the amount of foreign support monitors Organisations for Economic Cooperation and Development (OECD), which also defines the criteria of official developmental help.

139. The Czech Republic official developmental help costs between 2000-2006 are shown in the table:

Year		2000	2001	2002	2003	2004	2005	2006
Official developmental help	Bilateral help	245.40 million CZK	568.20 million CZK	1,025.00 million CZK	2,668.30 million CZK	1,631.50 million CZK	1,541.95 million CZK	1,756.70 million CZK
	Multilateral help	378.20 million CZK	439 million CZK	460.90 million CZK	287.60 million CZK	1,148.60 million CZK	1,694.01 million CZK	1,880.20 million CZK

140. Since 2006 75% of resources for the bilateral help projects were directed to the 8 priority countries: Angola, Bosnia and Herzegovina, Yemen, Moldavia, Mongolia, Serbia, Vietnam and Zambia. In 2008 the priority countries were: Barma, Belarus, Bosnia and Herzegovina, Georgia, Iraq, Cuba, Moldavia, Serbia and Ukraine. With the entry of the Czech Republic into the EU the Principles of the Foreign Development Help are the conceptual basis of closer territorial concentration of the developmental help. The selection of the priority countries is based on the following criteria: need for help, the ability of the country to receive help and the tradition of developmental cooperation. The developmental projects will continue and there are around 30 countries at present that receive help. It is essential that help is not divided amongst too many different projects but rather concentrated into a smaller number of countries and sectors.

141. The humanitarian program MEDEVAC⁴⁸ was designed for patients, in particular children from areas afflicted by war or other areas in need of help which have no means to receive medical assistance locally and when their medical condition is so serious that their life is in danger. The program is designed for patients in need of medical help which is unavailable in their home. The Ministry of the Interior provides the technical means and the possibility which enables medical help for these seriously ill and injured patients in the Czech Republic whilst at the same time guarantees the arrangement of the legal stay of these patients in the Czech Republic, as well as covering all the costs in relation to their medical cure and arrangement of transport back to their country of origin. The operation of child patients requires the written consent of the legal guardian in case of an essential medical operation the extent of which can only be predicted after expert examination in the Czech Republic. It is therefore necessary that within the program child patients are accompanied by the legal guardian in the Czech Republic.

142. Current statistics of the humanitarian program MEDEVAC show 114 transported cases that were given medical support in the Czech Republic (predominantly children), from areas afflicted by war or natural catastrophe, including Bosnia and Herzegovina, Kosovo, Chechnya, Iraq, Pakistan and Afghanistan between 1993-2007.

F. The Process of Preparation of Reports at National level

143. The reports are issued by the Department of the Secretariat of the Government Office of the Czech Republic for Human Rights on the basis of the sources given by the central bodies of the Government Administration: The Ministry of Transport, The Ministry of Finance, The Ministry of Culture, The Ministry of Defence, The Ministry for the Regional Development, The Ministry of Labour and Social Affairs, The Ministry of Justice, The Ministry of Education, Youth and Sports, The Ministry of the Interior, The Ministry of Foreign Affairs, The Ministry of Health, The Ministry of Agriculture, The Ministry of Environment, The Czech Statistic Office and the Ombudsman Office. Other sources of information are provided by non-government and non-profit making organisations and academic institutions.

⁴⁸ Resolution of the Government of the Czech Republic No. 907 from 26th July 2006, On the continuation of the humanitarian program of evacuation of disabled inhabitants and the Resolution of the Government of the Czech Republic No. 765 from 11th July 2007 On the continuation of the humanitarian program of evacuation of disabled inhabitants ('MEDEVAC').

144. Reports are processed by the interdepartmental comment procedure and submitted to the Government before they are sent to the UN General Secretariat.

3. Information on Non-discrimination and Equality and the Means of Preventing Discrimination and Inequality

145. The principle of equality is amended by the Constitution of the Czech Republic and the Charter. The Article 1, Charter states the freedom and equality of people in dignity and the rights. The Article 3, Charter Section 1, states: the fundamental rights and freedoms are guaranteed to all irrespective of gender, race, colour of the skin, language, faith or religion, political or other opinion, national or social origin, belonging to a national or ethnic minority, property, birth or other status. Article 3, Section 3, Charter provision: no person shall be caused by injury to the rights for the application of his fundamental rights and freedoms. The prohibition of discrimination is contained also in the Article 24, Charter, provision: states that belonging to any national or ethnic minority must not be detrimental to anyone.

Protection against discrimination is also amended by International Agreements by which the Czech Republic is legally bound.⁴⁹

146. The principle of equality is contained in particular in the provisions of the Civil Code and the Code of Civil Procedure, law on Employment,⁵⁰ law on State Social Support,⁵¹ law on Education,⁵² law on the Consumer Protection⁵³ and others.

147. The law on Employment prevents direct and indirect discrimination in the application of the law on Employment for reasons of gender, sexual orientation, race or ethnic origin, nationality, citizenship, social origin, birth, language, health, age, faith or religion, property, marital or family status, age or family duties, political or other opinion, membership and activity in political parties or movements, trade unions or employer organisations. Persecution is also prevented by law and the victim of discrimination has the right to seek protection in court.

⁴⁹ The International Convention on Elimination of All Forms of Racial Discrimination, The Convention on Elimination of All Forms of Discrimination Against Women, The International Covenant on Civil and Political Rights, International Covenant on Economic, Social and Cultural Rights and Convention on the Rights of the Child.

⁵⁰ Act No. 435/2004 Coll., On Employment, as amended.

⁵¹ Act No. 117/1995 Coll., On State Social Support, as amended.

⁵² Act No. 561/2004 Coll., On Pre-school, Primary, Secondary, Higher Vocational and other Education, as amended.

⁵³ Act No. 634/1992 Coll., as amended.

148. The Czech Republic provides protection against discrimination by means of courts. The court procedure and the involvement of participants in the civil court proceedings are amended by the Code of Civil Procedure which states that each individual has the right to seek protection in court for the injustice of the right being in danger or violated – the case proceeding in matters of individual civil rights protection. The Code of Civil Procedure states the principle of transference of the burden of proof in cases of alleged discrimination on the basis of race or ethnic origin in matters of providing medical support and social security, access to education and higher vocational qualification, access to public procurement, membership in employee or employer organisations, membership in professional and vocational associations and selling goods in the shop or offering services. The Code of Civil Procedure and The Code of Administrative Procedure allow the participants to be represented by associations in the matters of protection against discrimination on the basis of gender, race or ethnic origin, religion, faith, opinion, disability, age or sexual orientation providing that the statutes of the association contain the protection against discrimination. A similar resolution is contained in law on Consumer Protection which states that legal action may be placed for court proceedings in matters of consumer protection in absence by association representing the consumer in legal proceedings providing that the statutes of the association contain the appropriate objectives.

149. The particular provisions of The Code of Criminal Procedure and The Criminal Law ensure the form of penal procedure against race or ethnic origin discrimination. The Municipal Authorities also have the legal power to ensure penalisation against discrimination.

150. The Ombudsman of Rights acts in the name of the protection of the rights of individuals involved in official proceedings and proceedings of other state administration institutions if the procedure does not conform to law, principles of democratic legal state and good governance. The Ombudsman contributes to the protection of fundamental rights and freedoms in the case when the official body does not take legal measures against unlawful action.

151. The Czech Trade Inspection⁵⁴ controls and monitors the correct process and provision of services related to the sale or delivery of goods and products or offering services including the non-discrimination policy.

152. The Ministry of Labour and Social Affairs, Job Centres and The National Labour Inspectorate control the legality of employment in accordance with law. The control activity is in

⁵⁴ Act No. 64/1986 Coll., On Czech Trade Inspection, as amended.

particular concerned with the correct application of work and employment legislation procedure including the non-discrimination policy.

153. The Government follows the principle of equal opportunities for men and women in all its decision making processes with the belief that implementation of this principle is an effective method for the realisation of true equality. The individual Ministers have the duty to include education on human rights in relation to equal opportunities for men and women in educational programs and for the employees in the administration sector. Protection against various forms of discrimination in particular at the conceptual level and in the formation of policies is the responsibility of four Government advisory bodies – The Council of the Government of the Czech Republic for Human Rights, The Government Council for National Minorities, The Council of the Government of the Czech Republic for Equal Opportunities for Men and Women and The Council of the Government of the Czech Republic for the Roma Community Affairs.

154. The Government made a provision for the law on equal treatment and legal protection against discrimination – 'anti-discrimination law'⁵⁵ which is to unite the legislation on the protection against discrimination and to ensure the compliance of the Czech legal system with the EU legislation. Information on the proposal of the 'anti-discrimination law' is contained in the Third and Fourth Periodical Report on fulfilment of obligations which stem from the Convention on the Rights of the Child, Chapter on General Principles, No. 46, and following, as well as in the Third and Fourth Periodical Report on fulfilment of obligations which stem from the Convention on the Elimination of All Forms of Discrimination Against Women.

The number of convicted cases including the number of convicted for specific offences between 2003-2007:

Index	2003	2004	2005	2006	2007
Total number of convicted cases	66,131	68,442	67,561	69,445	75,728
Paragraph 219 - murder	173	143	153	121	118
Paragraph 221, 222, 225 – grievous bodily harm, affray	3,065	3,298	3,082	2,714	2,390
Paragraph 234 - robbery	1,587	1,695	1,608	1,532	1,411

⁵⁵ Parliament of the Czech Republic processed the provision of 'anti-discrimination law' No. 253 and approved on 23rd April 2008. The president vetoed the provision of the law on 16th May 2008.

Paragraph 241 to 243 – rape and sexual abuse	557	595	491	468	455
Paragraph 247, 248, 250 – theft, embezzlement, fraud	23, 465	22, 855	21, 263	20, 201	18, 747
Paragraph 246 – trafficking in women/Paragraph 232a trafficking in human beings ⁵⁶	5	12	20	1	0
	0	0	0	1	4

The total number of judges⁵⁷ up to 1st January 2005 and 2006:

Courts	Planned No.	Evidence No. ⁵⁸	Difference	Planned No.	Evidence No.	Difference

Candidates	0	23			15	

⁵⁶ In the case of information provided on the unlawful act of trafficking in human beings (Paragraph 232a), it is important to take into account that this resolution has been included in the criminal law by Act No. 537/2004 Coll., with legal force implemented from 22nd October 2004. The law is statistically monitored from 2006. Previously there was a criminal law against trafficking in women (Paragraph 246) for the purpose of sexual intercourse with legal force from 1st July 2002 on the basis of the amendment to the criminal law No. 134/2002 Coll., Trafficking in human beings (unlawful act of trafficking in human beings for the purpose of sexual intercourse). Amendment Paragraph 246 was abolished with legal force from 22nd October 2004 in relation to the above noted Paragraph 232a.

⁵⁷ The Ministry of Justice monitors the total numbers of judges at the individual stages of the judicial system with the exception of the Constitutional Court, always up to 1st January of each year. The tables show figures in the row under the 'evidence number'. The numbers of public prosecutors is monitored in the same way.

⁵⁸ The term 'evidence number' means the actual number of judges/public prosecutors operating in courts/public prosecutor's offices.
